ELLIE JINGJING YU

📞 020 424 2385   ✉ Ellyjj1@hotmail.com   📍 Auckland

PROFESSIONAL SUMMARY

With over a decade of work experience, my approach blends strong problem-solving skills with effective customer relations, providing exceptional technical support to coworkers and driving projects to successful completion while ensuring cost control.

I am a rapid learner and prepared to be a passionate programmer. I am delving into web development (JS + HTML) and front-end web frameworks (React), alongside mastering CI/CD practices geared towards acclimating to New Zealand's work environment.

PROJECTS

WRITING EVALUATION SYSTEM

June 2024–July 2024

- **Project Overview:** This project is designed to evaluate students' writing and provide feedback with OpenAI GPT API. This project includes frontend and backend parts, using React.js and Django.
- **Challenges and Solutions:** Firstly, the biggest challenge is coding. At that time, I started to learn coding for two months. Therefore, on the one hand, I learned programming on the internet to learn to code, for example, "CS50 web programming with Python and JavaScript" and "Introduction to AI with Python"; on the other hand, I debugged with the help of ChatGPT and practiced the skills I just learned. The Second challenge is integration with API and Security. I checked the documentation and online resources. I implemented environment variables to store sensitive information securely and followed Django's secure authentication and authorization processes guidelines.

MAUNGAWHAU INSTITUTE OF STUDIES（MIT） WEB APPLICATION

May 2024–July 2024

- **Project Overview:** This project was developed in the CI/CD course to establish the system with Django and React.js. The application includes modules for managing programs, lecturer information, student information, student marks, and student attendance.
- **Outcome:** With this project, I learned about the main technology of the IT industry in New Zealand and the use of GitHub, CircleCI, GitHub Action, and Vercel. I am familiar with CI tools, Automated Testing, and Deployment Automation in collaborative environments.

SKILLS

Microsoft Office products   Technical Support   Problem-Solving   JS + HTML   React   Jira

WORK EXPERIENCE

PROJECT MANAGER, BEIJING

KYLINSOFT CORPORATION, January 2020–May 2024

- As a project manager, I successfully led projects worth NZD 8 million in 2023, delivering on time and budget.
- I was responsible for managing end-to-end projects for enterprise clients. My role involved everything from pre-sale technical consulting to the completion of projects, often overseeing multiple high-stakes tasks simultaneously. To tackle these challenges, I coordinated multiple teams, got the support of all my leaders, and met strict deadlines.
- This experience reinforced my belief in the power of detailed planning, effective team coordination, and strong communication.

PRE-SALES CONSULTANT MANAGER, BEIJING

BEIJING NATIONSKY NETWORK TECHNOLOGY, May 2016–January 2020

- Leading a team of 7 and managing over 100 projects annually. My primary responsibilities include personnel coordination, support for key projects, client presentations, and managing bids and tenders.
- In a fiercely competitive market, I faced continuous challenges from clients and coworkers. I focused on building a cohesive team that could efficiently handle multiple tasks with Jira and adapt to dynamic situations. I leveraged my excellent understanding of customer needs and industry trends to drive our pre-sales activities. I also built a learning system with Confluence to ensure that every team member has the best work skills.

PRE-SALES CONSULTANT, BEIJING

BEIJING SMARTDOT TECHNOLOGY, May 2007–April 2016

- As a pre-sales consultant, I provided technical assistance and support to the sales team during the pre-sales phase, focusing on workflow systems, contract management systems, and CRM solutions, with a combined annual profit of NZD of 4.5 million.
- Demonstrated strong problem-solving skills to diagnose customer issues quickly and effectively.

DEVELOPMENT ENGINEER, BEIJING

CHINA RESOFT COMPUTER SYSTEM ENGINEERING, July 2005–May 2007

- Responsible for developing, testing, and maintaining applications.
- Provided technical support for existing applications, troubleshooted issues, and implemented solutions.

EDUCATION

MASTER IN INFORMATION TECHNOLOGY (MIT) CANDIDATE, AUCKLAND

Auckland Institute of Studies, Expected graduation December 2025

BA IN COMPUTER SCIENCE AND TECHNOLOGY

BEIJING JIAOTONG UNIVERSITY, January 2005
